

A QUARTER REVIEW:

The fourth quarter was a reversal of many of the themes that drove bond yields lower throughout the first nine months of the year. While it feels like a distant memory, there was genuine nervousness about the health of the labor market. Through July, the unemployment rate edged up nearly a full 1% from its cycle lows. While far from a recessionary panic, the softness in labor market data was enough evidence for the Fed to lower rates a full 50 basis points in September, followed by two 25 basis points cuts in each of the final two months of the year. While the Fed's gaze shifted toward the labor market, the bond market had other concerns. As election odds shifted in favor of President Trump, the prospect of a pro-growth and somewhat inflationary policy slate pushed long-term yields higher. In fact, from the day of the first rate cut (9/18/2024) the Fed Funds rate is 100 basis points lower, while the 10-year Treasury rate is 87 basis points higher. Suffice to say, it's been a historically unusual reaction to Fed rate cuts. Credit markets, on the other hand, were nearly as uneventful as equities. Spreads also adopted an optimistic view of election results and tightened 9 basis points during the quarter. Sector performance was relatively homogenous, however, with industrials, utilities, and finance all performing roughly in line with one another.

BLOOMBERG US AGGREGATE	-3.06%	1.25%	-2.41%	-0.33%	0.97%	N/A

PERFORMANCE SUMMARY:

The Johnson Core Plus Fixed Income Strategy fell -3.41% net of fees during the fourth quarter, underperforming the Bloomberg Aggregate Index which closed the quarter down -3.06%. The primary driver of the strategy's relative underperformance was its duration, which was approximately 0.5 years longer than its benchmark. Yield curve structure was an additional drag on relative performance, as the strategy's intermediate key rate duration was disproportionately impacted as the belly of the yield curve underperformed. The impact of rising interest rates was somewhat offset by the strategy's overweight to corporate bonds, which benefited as spreads tightened by 9 basis points during the quarter. Additionally, the Core Plus Strategy benefited from its income advantage over the index, due in large part to its allocation to select high-quality high yield offerings.

MARKET OUTLOOK AND PORTFOLIO POSITIONING:

Looking forward, we continue to position portfolios defensively. Corporate bond spreads closed the year near their lowest levels in over two decades. As a result, we believe that the total return opportunity from spread tightening has greatly diminished going forward. We continue to maintain an over-weight to corporates to maximize income but have lowered the corporate spread duration of portfolios further in order to insulate portfolios from the impact of rising spreads. While the Core Plus Strategy remains invested in certain high yield credits, our allocation to the sector remains below our long-term target given our defensive posture, and we continue to favor BBB-rated investment grade credits as a better combination of yield spread and credit quality.

The strategy's duration target remains roughly 50 basis points above its benchmark. While the economy has been more resilient than leading indicators would have implied, we believe the current level of interest rates has approached the upper end of a range of fair values, even in a scenario where the economy remains steady. While markets have reacted positively to the news of President Trump's re-election, meaningful tariffs and hawkish immigration policies may be headwinds for the economy and markets. With risk asset market valuations stretched across equities and credit, we continue to believe a more conservative approach is warranted. As always, please reach out to a member of the Johnson Team if you have any questions.
